Resilience: An MSME Power

“The world of business has been moving at a fast pace. With climatic, political, and environmental disturbances, currency fluctuations and yet lower growth, an MSME is at a crossroad.

While the start-ups adapt to faster growth cycles, an MSME is working hard to adapt to becoming a new-age business. While the questions are far too many, a business owner is perplexed in evaluating a direction to find his true potential.

Powered with Resilience, MSMEs businesses stay firm on the ground to beat any downturn or recession. This social fabric of MSMEs makes us unique and strong as a community and backbone for the economy.”

Rachana Chowdhary
