At the SAP Sapphire conference in Orlando, SAP SE unveiled sweeping innovations and collaborations that equip customers to tackle an uncertain future with confidence.

Breakthrough announcements included responsible AI built into business solutions, ledger-based accounting for carbon tracking, and industry-specific networks to bolster supply chain resilience. With these advances, SAP is helping customers transform their business models in the cloud, put sustainability at the center of their operations and boost agility to succeed amid ongoing change.

The MSME sector in India is on an ambitious growth curve and in recent years, there has been a progressive change in the mindsets of small business owners towards technology adoption. In an interesting insight, PayNearby, India's leading branchless banking and digital network, said that more than 71% Micro, Small and Medium Enterprises (MSMEs) in retail, use some form of digital technology for their day-to-day business operations. The report further highlighted that more than 80% of MSMEs admitted that the adoption of digital technology has had a positive impact on their businesses and personal lives.
